

VB WHOSALE GROUP INC.
UNDERGROUND FIBER OPTIC CONSTRUCTION

CAPABILITY STATEMENT

PRIME CONTRACT / TELECOM INFRASTRUCTURE SUPPORT

CORE CAPABILITY

Underground fiber placement built for scale.

VB WHOSALE GROUP INC. supports high-volume underground fiber construction with fiber blowing, pulling, mainline placement and conduit preparation. Our completed portfolio spans regional backbone builds, downtown manhole routes, data-center interconnects and ultra-high-count fiber.

UP TO 2 IN.

CONDUIT CAPABILITY

NETWORK EXPERIENCE

Project work supporting Google Fiber and Spectrum network deployments.

SERVICES & FIELD CAPABILITIES

- **Fiber cable blowing**
Pneumatic placement for long conduit runs
- **Underground mainline pulling**
Handholes, vaults and manhole routes
- **Conduit preparation**
Proofing, readiness checks, pull rope and mule tape
- **Conduit systems**
Project configurations up to 2 inches
- **Cable capability**
Project-specified cable sizes and counts through 1728-count
- **Production capacity**
Up to 20,000+ ft/day per crew depending on conditions
- **Mobilization**
Five crews structured for multi-state project support
- **Reporting**
Daily production and field progress communication

SELECTED COMPLETED EXPERIENCE

- **Louisiana** 1,000,000+ ft / 1728-count backbone fiber
- **Ohio** ~150,000 ft underground fiber placement
- **Alabama** ~130,000 ft regional mainline build
- **Oklahoma** ~100,000 ft multi-route underground build
- **Waco area, TX** ~75,000 ft / 24-count through 96-count
- **Cheyenne, WY** ~20,000 ft / 144-count and 288-count
- **Austin, TX**
~10,000 ft / downtown manholes / data-center interconnect
- **East Texas RDOF**
Longview - Marshall - Carthage regional project area

EQUIPMENT & CONTRACTOR READINESS

PRODUCTION SETUP

Condux Gulfstream 400, high-flow mobile air, hydraulic power systems and reel handling support.

PRIME CONTRACT SUPPORT

Insurance, safety program and qualification documentation available for onboarding and mobilization.

DIRECT COMMUNICATION

Responsive owner-level access for scope review, pricing, mobilization and field decisions.

*Production rate depends on route, access, conduit condition, cable, project setup and field conditions.
